

WASTE POLICY

2025

Waste Policy

TUI Magic Life Candia Maris | 2025

Vision & Commitment

This policy applies to TUI Magic Life Candia Maris and covers all types of activities and services provided by the hotel.

It reflects our commitment to sustainability through the responsible management of waste and the implementation of circular economy principles, aiming at waste prevention, reduction, recycling, and valorization of materials as resources for environmental protection.

Strategic Approach

The hotel's waste management strategy is structured around the following key pillars:

Waste Recording and Classification

A structured system for recording waste quantities and management methods is implemented to ensure transparency and compliance with current requirements.

Collaboration with Certified Recycling Partners

The resort collaborates with certified recycling and waste management organizations to ensure proper recycling, recovery, and reuse of materials.

Prevention and Reduction

Consumption intensity and the use of plastic products are continuously monitored, with a focus on reducing waste generation at the source.

Utilization of Organic Waste

Organic food waste generated during kitchen preparation (e.g. fruit and vegetable processing) is composted on-site.

In addition, post-consumer food waste from the hotel's restaurants is collected and delivered to specialized external facilities, where it is converted into biofuel, providing an alternative source of renewable energy.

Circular Practices

The resort promotes reuse of glass bottles and the gradual elimination of single-use plastics. Simultaneously, paper consumption is reduced through digital initiatives, such as electronic check-in systems, interactive in-room information via TV screens, and QR code applications..

Water Reduction Practices

- Composting
- Bioenergy production
- Fruit dehydration
- Reduction of single-use plastics
- Glass reuse
- Paper reduction
- Digital transformation

Monitoring & Indicators

The implementation of this policy is periodically evaluated through the monitoring of both quantitative and qualitative indicators, with special emphasis on:

- Total quantity of waste generated
- Quantity of materials recycled
- Quantity of waste sent to landfill (disposal)

Training & Awareness

A crucial pillar of this policy's implementation is the training and engagement of hotel staff. Through regular training sessions, employees are informed on core and specialized aspects of waste management.

At the same time, guests are encouraged to participate in waste reduction and recycling efforts through discreet signage and awareness messages placed throughout the resort.

Oversight

The implementation of the Waste Policy is monitored centrally by the Sustainability Department, in collaboration with Hotel Management.

Data are collected, indicators are tracked, and an annual evaluation is conducted.

Should proposals for revision or improvement of the policy arise, they are reviewed by the Group to ensure continuous improvement and alignment with sustainability principles.
